Memo

To: Beautification & Energy Efficiency Board (BEEB) Members

From: Ralph E. Reigelsperger, Public Works & Utilities Director 

Date: February 8, 2019

Re: Energy Efficiency Associated with Capital Improvement Projects

I fully support the BEEB goals of energy efficiency and energy savings for City operations. Please know that when reviewing CIPs, we always strive for energy efficiency to save utility customers' money. Previous presentations to the board from staff provided numerous examples. All of our projects include energy-saving components when they make sense from a cost-benefit standpoint. I will communicate further with staff on how we can work with the BEEB to continue to achieve these goals.
